SUMMARY

An analytical, hard working web developer with a passion for learning. I am experienced in Ruby, JavaScript, SQL and have a background in Electrical Engineering. I want to use my problem-solving skills and technology to solve challenging problems.

SKILLS

Object oriented programming using Ruby and JavaScript. Ruby on Rails, Sinatra, React, SQL, HTML, CSS, Data Structures & Algorithms.

PERSONAL PROJECTS

Trivia Zone – <https://github.com/soumyaveer/trivia-zone>

Trivia Zone is a fun way to test your knowledge and compete with others online.

- Uses Ruby on Rails and Postgres on the backend. Continuous Integration via CircleCI and deployed on Heroku.
- Uses JQuery, Bootstrap and custom CSS on the frontend.
- Uses Devise and OmniAuth for Facebook OAuth authentication.

Reminders – <https://github.com/soumyaveer/reminders>

This app helps you manage important tasks by scheduling them via email notifications.

- Uses Ruby on Rails as the backend API server. Deployed on Heroku.
- Uses React, Redux, React Router on the frontend.

Book Progress – <https://github.com/soumyaveer/book-progress>

Book Progress helps you track your reading progress and watch what others are reading.

- Uses Sinatra and Postgres on the backend. Deployed on Heroku.
- Uses CSS, Bootstrap on the frontend.
- Uses a custom signup and authentication system written from scratch.

PROFESSIONAL EXPERIENCE

Software Consulting

The Production Management Group – Contact Management System

September 2018—Current, San Mateo, CA

- Rewrite the internal company contact management system. The legacy system is written in Rails 3, with server generated views. The rewrite (currently in progress) is in Rails 5.2 with APIs consumed by a React frontend. Also focus on performance, legacy usability nuances and bugs. New features will be added once the rewrite is complete.
- Push data from the contact management system to a third party CRM used by the sales team (via a JSON API).
- Working under the mentorship of a senior software engineer (often times pair programming).
- Technologies: Rails 5.2, Sidekiq, React, Redux, PostgreSQL.
- Tooling: Github, CircleCI, RubyMine, HoundCI.

Math Tutor

University of Houston

June 2014—May 2015, Houston, Texas

- Taught undergraduate students algebra, geometry, business calculus, and other Math related undergraduate courses.

Systems Engineer

Infosys, Ltd.

November 2009—October 2012, Pune, India

- Developed and automated the execution of SQL queries to generate billing reports.
- Worked to diagnose and fix bugs in one of the Bank of America applications.

EDUCATION

Flatiron School (on a scholarship from shegeeksout.com)

July 2017—April 2018

- 8 month Fullstack Web Development program. The highlights of this program were: Ruby, Javascript, Rails, SQL, React, HTML, CSS, Data Structures & Algorithms.

University of Houston

August 2013—May 2015, Houston, Texas

- Degree: M.S. in Electrical Engineering. GPA 3.6

Visvesvaraya Technological University

August 2005—May 2009, Bangalore, India

- Degree: BE. in Electronics and Communications Engineering. GPA 3.6
